- 16 -

REMARKS

This Amendment is submitted pursuant to 37 CFR 1.312. Claims 1, 12 and 13 have been amended to correct inadvertent typographical errors. In addition, it is noted that claims 1 and 13 had previously been amended in the Amendment of July 9, 2002 to include the formula shown in Figure 1. Likewise, claim 12 had previously been amended to include the formula shown in Figure 3. In subsequent amendments, the brackets and the subscript y had been inadvertently omitted from these claims. Claims 1, 12 and 13 currently show the brackets and subscript y to reflect the previous amendments.

Claims 10 and 20 have been amended to delete reference to Figure 1 and insert the formula of Figure 1. Claims 10 and 20 have also been amended to change "amide" to "amido". Support for this typographical correction can be found at page 24, line 18 of the specification. Composition claim 20 has also been amended to delete the process limitation in (e).

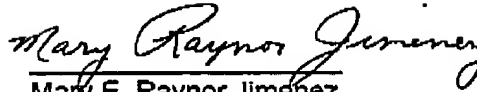

While the tricarbonyl group in claim 8 has not previously been amended, one of the bonds in the tricarbonyl group had been inadvertently moved in previous amendments. Claim 8 is currently correct. Finally, claim 16 had previously been amended to properly present the structure of the tetracarbonyl radical. In the last amendment, however, the changes were inadvertently omitted. Those changes have been reinserted.

The amendments presented herewith are formal in nature and do not require additional search. It is therefore respectfully requested that the amendments presented herewith be entered.
